

# MODULAR CONSTRUCTIONS

**Apartment block - Bedroom** - White acoustic ceiling and printed wall.

# The 5 key...

**Residential - living room** - White acoustic box with light integrations

**...CLIPSO® benefits for walls and ceilings in modular constructions:**

- 1. Adaptability**
- 2. Cold and dry installation**
- 3. Weight (light)**
- 4. Construction defects can be adjusted**
- 5. Reactivity**

**Desk** - white ceiling and walls

**Residential - Bathroom** - Acoustic ceiling and printed wall

## CLIPSO® EXPERIENCE

In such depths as an old container that has been converted into housing, lighting is essential to create a warm interior. Every millimetre counts here. The integration of lighting in surfaces also has a second attraction, as the taut canvas offers a flawless finish without losing any height. Everything can be printed with SO DECO graphics or visuals so as to directly integrate a decorative tapestry effect into the space.

## CLIPSO® EXPERIENCE

Industrialised modular construction is a faster construction solution. Faster and more responsible. To optimise layout, walls and ceilings must offer particularly clever interior design solutions.

All surfaces are optimised with acoustic solutions that reduce sound reverberation. As installation can take place in record time, modular spaces are fitted very quickly and the service ducts disappear in the plenum space.

Whether it's timber framed modular houses, a container of mobile homes or even tiny houses, CLIPSO® meets the various needs associated with designing a habitat geared toward tomorrow, combining efficiency and respect for the environment.

## CLIPSO® EXPERIENCE

CLIPSO® is an ideal layout solution for modular constructions. Free from PVC and toxic substances (CHR) and volatile organic compounds (VOCs), the taut coverings of the ceilings and walls guarantee the best quality of interior air.

CLIPSO® walls and ceilings require less labour and installation time than conventional installations, allowing you to make significant savings.

The CLIPSO® concept helps to give these new, warm, cosy habitats customisation possibilities and optimum comfort.

A winning solution.

Private home - White ceiling
